Check Other Settings when using Chrome Version 80

If you are using Chrome Version 80, perform these additional steps:

- 1 In the address bar, enter **chrome://flags** and press **Enter**.
- 2 In the search bar at the top of the screen, enter **SameSite**.
- 3 Change all the settings to **Disabled**:
 - SameSite by default cookies
 - Enable Removing SameSite=None cookies
 - Cookies without SameSite must be secure
- 4 After changing the settings to **Disabled**, click the blue **Relaunch** button at the bottom of the page.

Check Remote Testing with Proctorio Requirements

If your institution has chosen to use Proctorio, you can now take assessments remotely on either a PC (Windows 10 or later) or a Mac (Mac OS® x 10.13 or later).

➔ **IMPORTANT!** Before testing, be sure to view the video, [ATI Proctorio Settings Fix](#).

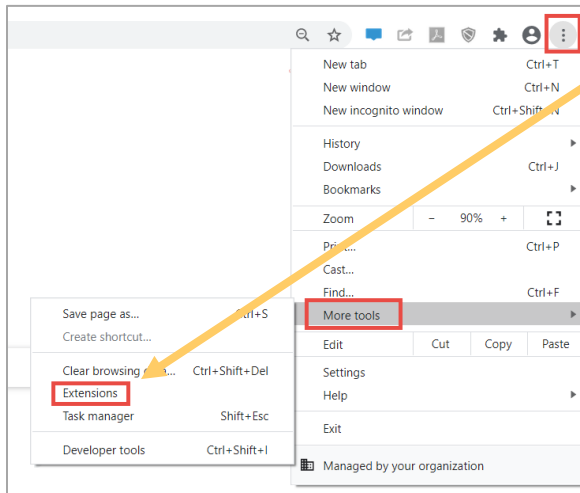

To test remotely, you must have the following:

- **Browser:** Google Chrome
- **Microphone:** Any microphone, either internal or external

- **Webcam:** 320 x 240 VGA resolution, either internal or external
- **Internet Speed:** 0.5 – 1.0 Mbps.
(Test your internet speed using www.speedtest.net)

If you meet the above requirements and are still experiencing difficulty:

- Uninstall and reinstall the Proctorio Google Chrome plug-in.

- In the Google Chrome browser, click the three Ellipse icon in the upper right corner.
- Click More tools > Extensions.

- Locate the Proctorio extension and click **Remove**.

- On the atitesting.com student site, click **MY ATI > TEST** to enter your assessment.
- Click the **click here** link to open the Chrome Web Store.

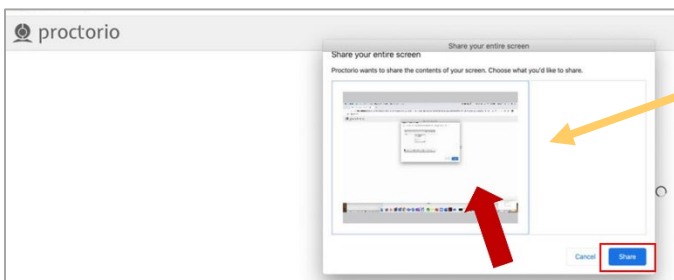

- Click **Add to Chrome**.

- On the confirmation window, click **Add extension**.

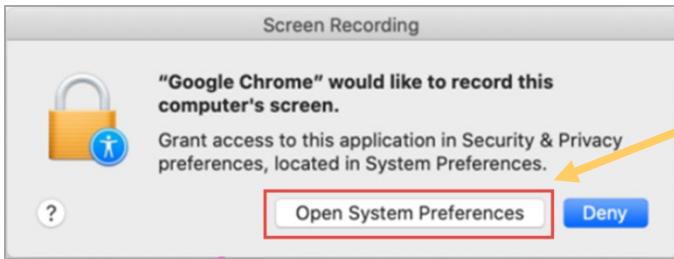

- Try using a different IP address or internet connection. For example, some students have connected successfully to their iPhone hotspot instead of a weak, home connection.
- Close or stop any programs or processes that are taking resources from your computer and reducing its ability to run Proctorio.
- Arrange for the PC or Mac on which you are testing to be the only device connected to the network.

If you are having trouble sharing your screen:

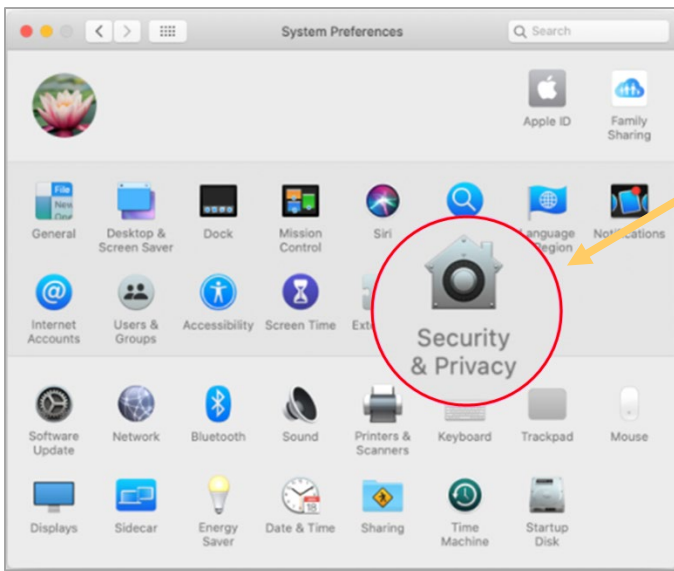

- At the prompt to allow screen share, be sure to click the small screen within the window. Doing this enables the **Share** button and changes its color to blue.

If you are having trouble enabling screen recording permissions for Macs (macOS Catalina (10.15) and later):

At the Screen Recording prompt, click **Open System Preferences**.

On the System Preferences window, click **Security & Privacy**.

On the Security & Privacy window:

- Click **Screen Recording**.
- Select the **Google Chrome** text box.
- Click the **Lock** icon to save your changes.
